

I am writing further to the Water Sensitive Urban Design (WSUD) Program's GIS Register at <http://www.wsud.org/gis-register/> and how the Sydney Metropolitan CMA (SMCMA) wants to work with you to include your council's information.

The benefits to your council of participating in this project include the following:

- Raising the profile of your councils WSUD Infrastructure;
- Assisting the collation of information for Asset Management purposes, including GIS Location of systems - traditional & WSUD;
- Assisting the SMCMA's strategic planning in your area. Including future grant funding allocation, when available;
- Reciprocal access rights to SMCMA GIS Data for internal Council use.

Furthermore, the SMCMA will provide reciprocal rights to the GIS Data located within your LGA that your council can access. Including:

- Land uses;
- Impervious surfaces;
- Rapid Fauna Habitat assessment data;
- Regional Biodiversity Corridor Mapping;
- Priority Weed Mapping;
- Native Vegetation Mapping;
- Salinity Mapping;
- Waterway Health Strategy Stream Condition Assessment Mapping;
- Wetland Prioritisation Mapping.

For further information about the GIS Project and the benefits to your council, please Kate Black, Program Manager, WSUD Program on (02) 9895 6206 or via kate.black@cma.nsw.gov.au
